Summary

I am a cyber-security undergraduate looking for a prospective internship at your esteemed organization.

I've a diverse set of skills, and experiences. I am skilled at frontend and backend development including software development and automation and information security. I am also experienced in sales and customer service side of operations.

I am musically trained and active in sports (varsity volleyball team). I've a hyper-realistic outlook in life and prefer to do things that are new, challenging, and creative.
